

## SHORT COMMUNICATION

New combinations in *Liparis* Rich. and *Pterostylis* R.Br. for two species of Orchidaceae from Queensland

Peter D. Bostock

Queensland Herbarium, Environmental Protection Agency, Brisbane Botanic Gardens, Mt Coot-tha Road, Toowong, Queensland 4066, Australia. Email: [peter.bostock@epa.qld.gov.au](mailto:peter.bostock@epa.qld.gov.au)

A number of segregate genera in Orchidaceae have been recently published (e.g. *Bunochilus* D.L.Jones & M.A.Clem.—segregated from *Pterostylis* R.Br.) or reinstated (e.g. *Diteilis* Raf.—segregated from *Liparis* Rich.) that are not currently recognised by the Queensland Herbarium. Two endemic Queensland species have been named in *Bunochilus* (Jones 2006a) and *Diteilis* (Jones 2006b) that require combinations in *Pterostylis* and *Liparis* respectively.

***Pterostylis vitrea*** (D.L.Jones) Bostock, **combinatio nova**

**Basionym:** *Bunochilus vitreus* D.L.Jones, *Austral. Orchid Res.* 5: 116 (2006).

***Liparis petricola*** (D.L.Jones & B.Gray) Bostock, **combinatio nova**

**Basionym:** *Diteilis petricola* D.L.Jones & B.Gray, *Austral. Orchid. Res.* 5: 74 (2006).
